Education

National Institute of Technology, Andhra Pradesh

Nov 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering — CGPA: 7.97/10.0

Tadepalligudem, AP

Relevant Coursework

- Data Structures and Algorithms
- Database Management Systems
- Computer Networks
- Design and Analysis of Algorithms
- Operating Systems
- Object Oriented Programming

Experience

Riverbed Technology

May 2026 – Present

Full Stack Developer Intern

Bangalore, Karnataka

- Contributing to the development of DataExpress, a high-speed enterprise platform for secure transfer of petabyte-scale datasets across data centers and cloud environments.
- Building full-stack features using Angular for the frontend and Python for backend services, with PostgreSQL for data persistence and Docker for containerized deployments.
- Working on transfer monitoring and management workflows to enable real-time visibility into large-scale data movement jobs.

Think Logic Tech Solutions Private Limited | 🔗

Nov 2024 – Jan 2025

Full Stack App Developer Intern

Remote

- Developed a scalable PG Management application by designing a refined schema, ensuring high scalability.
- Launched essential features such as user authentication and payment gateway booking, providing critical functionality required for the platform's initial user base and partner onboarding.
- Integrated Razorpay for digital transactions and Hyperverge for photo ID verification, replacing manual verification workflows with automated API-driven solutions.

Technical Skills

Languages: C++, Python, JavaScript, Java, C, HTML/CSS, SQL

Developer Tools: VS Code, Android Studio, Postman, GitHub, Docker, Kubernetes

Technologies/Frameworks: Next.js, React.js, React Native, Redux, Node.js, Express.js, Angular.js, AWS (DynamoDB, IAM), OCI, Stripe, Tailwind CSS, MongoDB, PostgreSQL, MySQL, Prisma, Git

Projects

StudyNotion - An EdTech platform | *React.js, Node.js, Express.js, MongoDB* | 🔗 | 📄 Nov 2024 – Jan 2025

- Engineered a scalable MERN stack application connecting mentors and students, utilizing RESTful APIs for efficient content delivery and course management.
- Integrated Razorpay API to facilitate secure payment processing, ensuring a standardized and error-free transaction lifecycle for course purchases.
- Implemented data visualization features using Chart.js, providing instructors with real-time analytics on course engagement and revenue.

Time Capsule – Digital Vault | *Next.js, AWS, Stripe* | 🔗 | 📄

Nov 2025 – Dec 2025

- Built a full-stack application for securing digital memories, utilizing AWS DynamoDB for serverless data persistence and Google OAuth for secure authentication.
- Implemented Stripe Payment Gateway with webhook listeners to automate subscription management and premium feature provisioning.
- Connected the Spotify API to fetch and embed rich media metadata, creating a multimedia-rich user experience.

Achievements & Extracurricular

- Solved 700+ DSA problems on LeetCode and GeeksForGeeks.
- Contributed as a Full Stack Web Developer to TechKriya'24 and Vulcanzy'24, facilitating registration for 2,000+ students from different colleges across 100+ events.
- Member of the Development Team at Google Developers Club, NIT Andhra Pradesh, organizing technical events.
- Ranked among the top 1.5% of students who appeared for JEE Mains 2022.
